

Imagine Movie

Set up your views like you would like them to look, 2d view and 3d view.

In 3d view choose Navigation/Flight Path Editor.

1= Digitize flight path in 2d view.

Select Edit/Set Elevation, ASL 200' OK

Set all fields in Flight Path Editor, like

Look Pitch= -20, that is looking down 20%.

FOV= your field of view

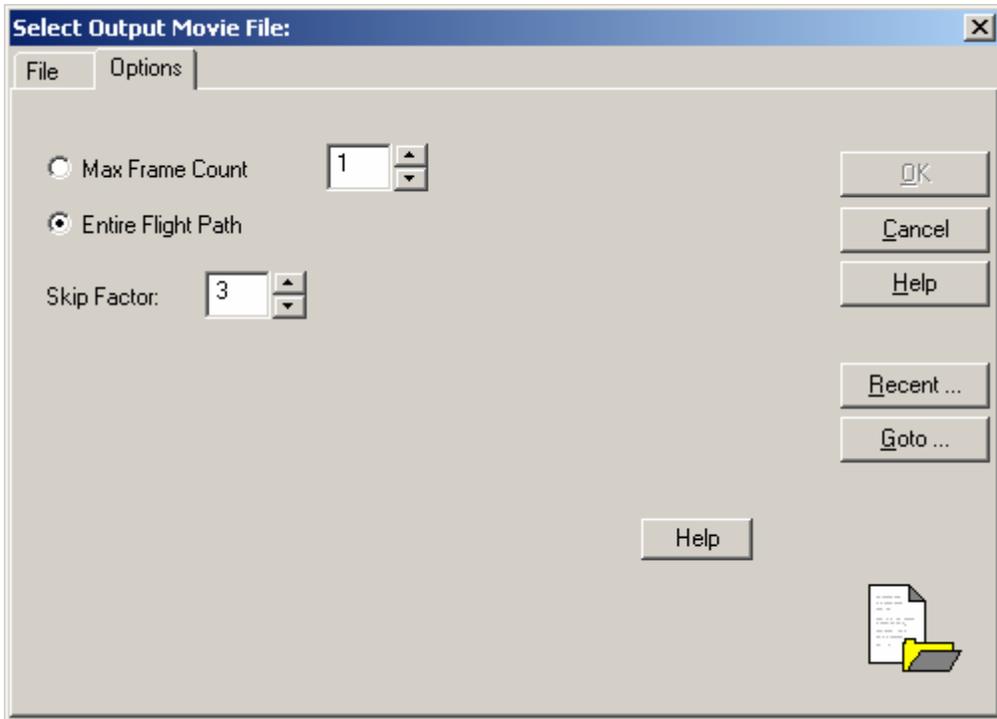

Speed= 5

2= to save settings you just set

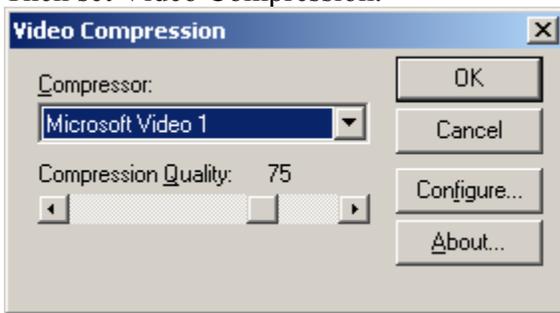

Then save the flight path to a file.

You can see how it is going to look by sliding the slide bar.

Then go to the 3d view and click on the camera icon, save the avi to a file, and choose options, do entire flight path, and skip factor.

Then set Video Compression.

3= Then go back and choose run on the Flight Path Editor.
