Email: Richard.Mochow@usace.army.mil

**POSTMASTER PLEASE POST UNTIL:**

**PUBLIC NOTICE NO.**

MVM-2004-632-RM

**Public Notice Date**

September 21, 2004

**Expiration Date**

October 21, 2004

**JOINT PUBLIC NOTICE:** This public notice is issued jointly with the Missouri Department of Natural Resources. The Department of Natural Resources will use the comments to this notice in deciding whether to grant Section 401 water quality certification. Commenters are requested to furnish a copy of their comments to the Missouri Department of Natural Resources, Watershed Protection Program, PO Box 176, Jefferson City, MO 65102-0176.

**AUTHORITY:** This notice announces an application submitted for a Department of the Army Permit under Section 404 of the Clean Water Act, pursuant to 33 CFR 325, as published in the Federal Register dated November 13, 1986.

**APPLICANT:** Combs Land Co.  
Mr. Jerry Combs  
Box 787  
Kennett, MO 63857-0787  
(573) 888-4646

**LOCATION:** The site is located 2-miles north of Bragg City on CR 285, in Pemiscot County, Missouri. It is at latitude 36° 18' 34", longitude 89° 54' 36", in S6, T19N, R11E, on the Bragg City 7.5 minute USGS quadrangle map (see enclosed Location Map Sheet 1 of 3).

**PURPOSE:** To precision land level a field that includes a 1.1-acre Farmed Wetland (FW). The overall project purpose is to level this 71.5-acre field in order to better utilize and conserve irrigation water and for rice production.

**DESCRIPTION OF WORK:** The project site is a 1.1-acre remnant of an unnamed slough, which has been farmed for many years. The slough, over its entire length, has been channelized and diverted into Ditch No. 69, which borders the west side of the field. The project consists of filling a 1.1-acre FW by land leveling the field. The applicant proposes to mitigate the lost wetland functions at a 1:1 ratio by purchasing 1.1 credits in the SEMO Agricultural Mitigation Bank.

The purpose of this public notice is to advise all interested parties of the activities for which a permit is sought and to solicit comments and information necessary to evaluate the probable impact on the public interest.

The Corps of Engineers evaluation of the impact of the activity on the public interest will include application of the guidelines promulgated by the Administrator, EPA, under authority of Section 404(b) of the Clean Water Act.

No endangered or threatened species, or their critical habitat, are known to exist in the project area. This application is being coordinated with the U.S. Fish and Wildlife Service. Any comments they may have regarding endangered or threatened wildlife or plants, or their critical habitat, will be considered in our evaluation of the described work.

The National Register of Historic Places has been consulted, and it has been determined that there are no properties currently listed in the register which will be affected by the work. The consultation of the National Register will constitute the full extent of cultural resources investigation by this office unless we are made aware as a result of comments received in response to this notice or by other means of the existence of specific structures or sites which might be affected by the work. Copies of the public notice are being sent to the State Archeologist & State Historic Preservation Officer.

The decision whether to issue a permit will be based on an evaluation of the probable impact, including cumulative impacts, of the activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the activity, must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the activity will be considered, including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and, in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of the proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition, or deny a permit for the proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the overall public interest of the proposed activity.

Any person who has an interest, which may be affected by the deposition of this material, may request a public hearing. The request must be submitted in writing to the District Engineer within the comment period of this notice and must clearly set forth the interest, which may be affected, and the manner in which the interest may be affected by this activity. The District Engineer will determine if the issues raised are substantial and whether a hearing is needed for making a decision.

If you wish to obtain additional information or to submit comments on the application, please contact Richard Mochow or Gregg Williams at the U. S. Army Corps of Engineers, 167 North Main Street, RM B202, Memphis, Tennessee 38103-1894, telephone 901/544-0732.

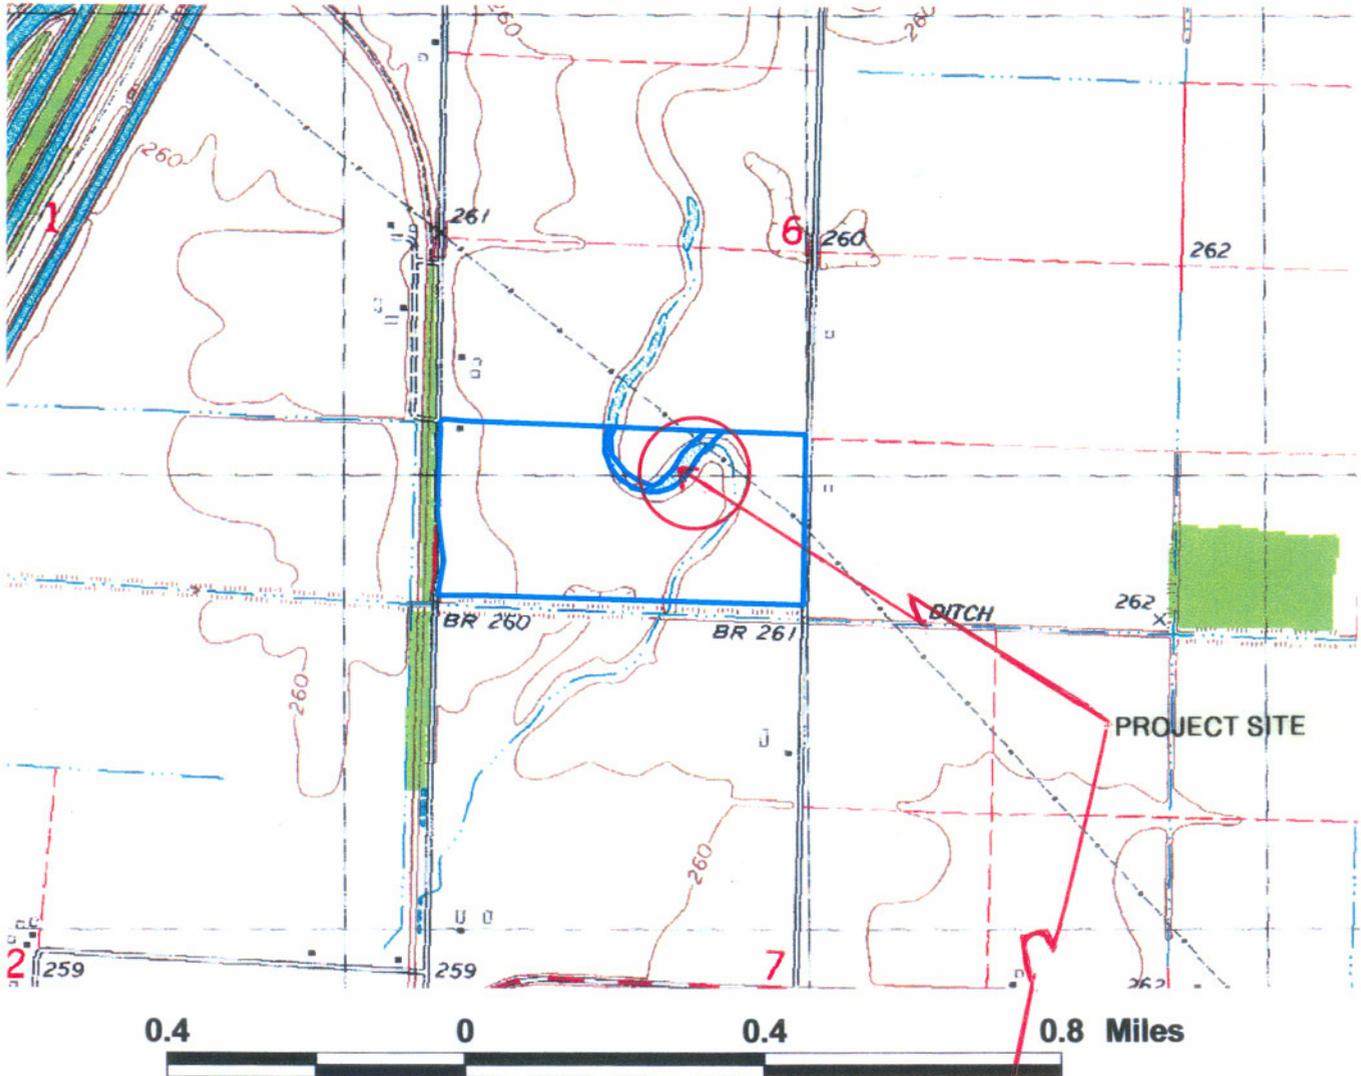

Comments should be forwarded to reach this office by October 21, 2004.
