

**DEPARTMENT OF THE ARMY**  
U.S. ARMY CORPS OF ENGINEERS, MEMPHIS DISTRICT  
167 NORTH MAIN STREET B-202  
MEMPHIS, TENNESSEE 38103-1894

## **PUBLIC NOTICE**

**FILE NUMBER:** MVM-2024-253

**PUBLIC NOTICE DATE:** January 7, 2025

**EXPIRATION DATE:** February 5, 2025

---

**JOINT PUBLIC NOTICE:** This public notice is issued jointly with the Arkansas Department of Energy and Environment, Division of Environmental Quality. The Division will use the comments to this notice in deciding whether to grant Section 401 Water Quality Certification. Commenters are requested to furnish a copy of their comments to the Division of Environmental Quality by email to [jim.wise@adeq.state.ar.us](mailto:jim.wise@adeq.state.ar.us) or by mail to 5301 Northshore Drive, Little Rock, Arkansas 72118-5317, ATTN: Office of Water Quality.

**AUTHORITY:** Pursuant to 33 CFR 325, as published in the Federal Register dated November 13, 1986, this notice announces an application submitted for a Department of the Army Permit under Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbors Act of 1899. The authority to grant permission for temporary or permanent alterations of any U.S. Army Corps of Engineers federally authorized civil works project is contained in Section 14 of the Rivers and Harbors Act of 1899 and codified in 33 USC 408.

**APPLICANT:**

Lenore Trammell  
Big River Steel, LLC  
P.O. Box 707  
Osceola, Arkansas 72370  
(870) 819-3031

**AGENT:**

Andrew Rike  
Harbor Environmental, Inc.  
5800 Evergreen Drive  
Little Rock, Arkansas 72205  
(501) 663-8800

**PURPOSE:** The purpose of the project is to conduct dredging to allow continued barge loading and fleeting activities.

**LOCATION:** The proposed project is located on the west (right descending) bank of the Mississippi River at River Mile 782 centered at approximate Latitude 35.648476°N and Longitude -89.905323°W in Mississippi County, Arkansas, on the Osceola 7.5-minute quadrangle map (Attachment 1).

**DESCRIPTION OF WORK:** The applicant's proposed project would entail dredging of approximately 717,000 cubic yards of accumulated silt and sediment. Dredging would occur in three locations: the first is approximately 7,475 feet long; the second is approximately 1,075 feet long; and the third is approximately 1,310 feet long (Attachment 2). As shown on the drawing, the widths of the areas to be dredged range

from 220 feet to 845 feet. Depths would vary but the average depth of dredging would be approximately five (5) feet. Dredging would be completed by either mechanical or hydraulic means. The applicant is proposing to place the dredged material back into the Mississippi River as shown in Attachment 2.

The applicant has requested authorization to conduct maintenance dredging over a 10-year period. Maintenance dredging could be repeated, as necessary, throughout the authorization period. The applicant estimates dredging 250,000 cubic yards in 2028 and 250,000 cubic yards in 2033.

**AVOIDANCE/MINIMIZATION:** The applicant proposes to dredge only the amount of material required to meet their stated project purpose.

**MITIGATION:** The applicant did not propose compensatory mitigation for the activity.

**WATER QUALITY CERTIFICATION:** The Clean Water Act (CWA) Section 401 Water Quality Certification Improvement Rule (Certification Rule, 40 CFR 121), effective November 27, 2023, requires certification for any license or permit that authorizes an activity that may result in a discharge. The scope for CWA Section 401 certification by the certifying authority shall evaluate whether the activity will comply with applicable water quality requirements. The certifying authority's evaluation is limited to the water quality-related impacts from the activity subject to the federal license or permit, including the activity's construction and operation. The applicant is solely responsible for requesting certification and providing required information to the certifying agency. In accordance with Certification Rule part 121.12, the Corps of Engineers will notify the U.S. Environmental Protection Agency Administrator when it has received a Department of the Army (DA) Permit application and the related certification. The Administrator is responsible for determining if the discharge may affect water quality in a neighboring jurisdiction. The DA permit may not be issued pending the conclusion of the Administrator's determination of effects on neighboring jurisdictions.

**ENDANGERED SPECIES:** There are two federally listed mammal species that are known to have ranges that include the project area. They are the federally endangered Northern Long-eared Bat and the federally proposed endangered Tricolored Bat. There are three bird species, the federally threatened Eastern Black Rail, the federally threatened Piping Plover, and the federally threatened Rufa Red Knot. There is one fish species, the federally endangered Pallid Sturgeon. There is one insect species, the federally proposed threatened Monarch Butterfly. There is one reptile species, the federally proposed threatened Alligator Snapping Turtle. There is one mussel species, the federally endangered Fat Pocketbook. There is one flowering plant species, the federally endangered Pondberry. This project is being coordinated with the United States Fish and Wildlife Service. Any comments they may have regarding endangered or threatened wildlife or plants, or their critical habitat, will be considered in our evaluation of the described work.

**CULTURAL RESOURCES:** In compliance with Section 106 of the National Historic Preservation Act of 1966 (NHPA), as amended, the Memphis District is soliciting comments from federal, state, and local agencies, federally recognized Indian Tribes,

the public, and other interested parties in order to identify and evaluate potential impacts of the proposed action on historic properties.

**FLOODPLAIN:** In accordance with 44 CFR Part 60 (Floodplain Management and Use), participating communities are required to review all proposed development to determine if a floodplain development permit is required. Floodplain administrators should review the proposed public notice and notify this office of any floodplain development permit requirements.

**PUBLIC INTEREST REVIEW:** The purpose of this public notice is to advise all interested parties of the activities for which a permit is sought and to solicit comments and information necessary to evaluate the probable impact on the public interest.

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the project must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the project will be considered, including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public, federal, state, and local agencies and officials, federally recognized Indian Tribes, and other interested parties in order to consider and evaluate the impacts of the proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition, or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

**ENVIRONMENTAL JUSTICE:** In accordance with E.O. 12898, E.O. 14008, and E.O. 14096, the Corps of Engineers will specifically consider the effects of the proposed action on communities with environmental justice concerns, including economically disadvantaged communities, communities of color, and other socioeconomic groups that could be disproportionately affected by environmental and other effects. As part of our environmental justice review, the Corps of Engineers seeks additional information from the public, community leaders, local officials, and others regarding issues of environmental justice related to the proposed action.

**PUBLIC HEARING:** Any person may request, in writing, within the comment period specified in this notice that a public hearing be held to consider this application. Requests for a public hearing shall state, with particularity, the reason for holding a public hearing. The District Engineer will determine if the issues raised are substantial and whether a hearing is needed for making a decision. If a public hearing is held, it will be for the purpose of obtaining additional information that we could not otherwise obtain through a public notice process and not to inform the public about the specific details of the project in greater detail than what is found in this notice. This is not a Corps of Engineers project, and we are not a proponent nor are we an opponent of the project. We are merely the permitting authority of Section 404 and Section 10 permits required by our office.

**COMMENTS OR REQUESTS FOR ADDITIONAL INFORMATION:** Comments should be submitted to <https://rrs.usace.army.mil/rrs/public-notices>

or to the Corps of Engineers, Memphis District, by email or mail:

U.S. Army Corps of Engineers, Memphis District  
Attn: Josh Bright  
167 North Main Street, Room B-202  
Memphis, Tennessee 38103-1894  
E-mail: [joshua.k.bright@usace.army.mil](mailto:joshua.k.bright@usace.army.mil)  
Phone: (901) 828-0359

The Corps of Engineers may provide copies of all comments, including the name and address of those providing comments, to the applicant for consideration and response prior to a decision. Comments must be received by the expiration date listed on page one of this notice.

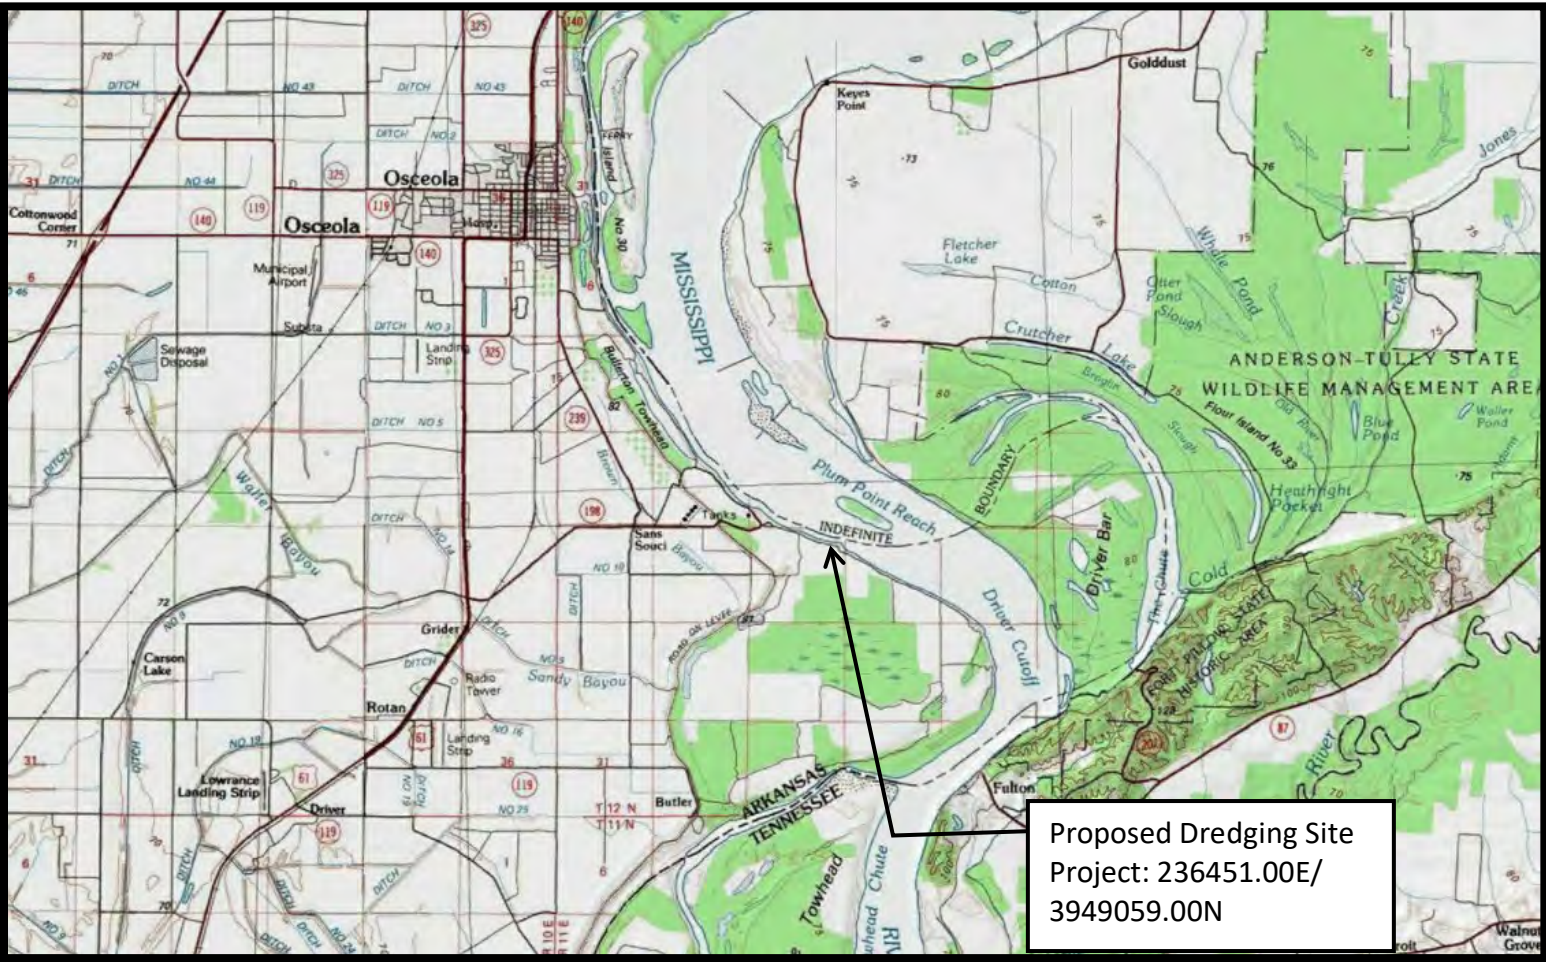

For Final Individual Permit Actions in the Memphis District, go to the following link: <http://permits.ops.usace.army.mil/orm-public>. Using the Filter by District drop down box, select MVM-Memphis District, then select the year and month. Information will populate in the table below. All pending individual permits can be located by selecting the "Pending IP" tab. All of the environmental documents and statements of findings supporting issuance or denial of the permit decisions are available upon written request and, where applicable, upon payment of administrative fees. They are also available at the Memphis District Regulatory Division office for examination.

Gregg W. Williams  
Chief  
Regulatory Division
