U.S.C. Chapter 33, Section 408 Permission Evaluation

TITLE: Section 408 Permission Evaluation for Arkansas Electric Cooperative Corporation Utility Bores, Cross County, Arkansas.

INTRODUCTION: The authority to grant permission for temporary or permanent alterations of any U.S. Army Corps of Engineers (USACE) federally authorized civil works project is contained in Section 14 of the Rivers and Harbors Act of 1899 and codified in 33 USC 408. Arkansas Electric Cooperative Corporation (AECC) is proposing to install fiber optic cables near Parkin, Arkansas (Figure 1).

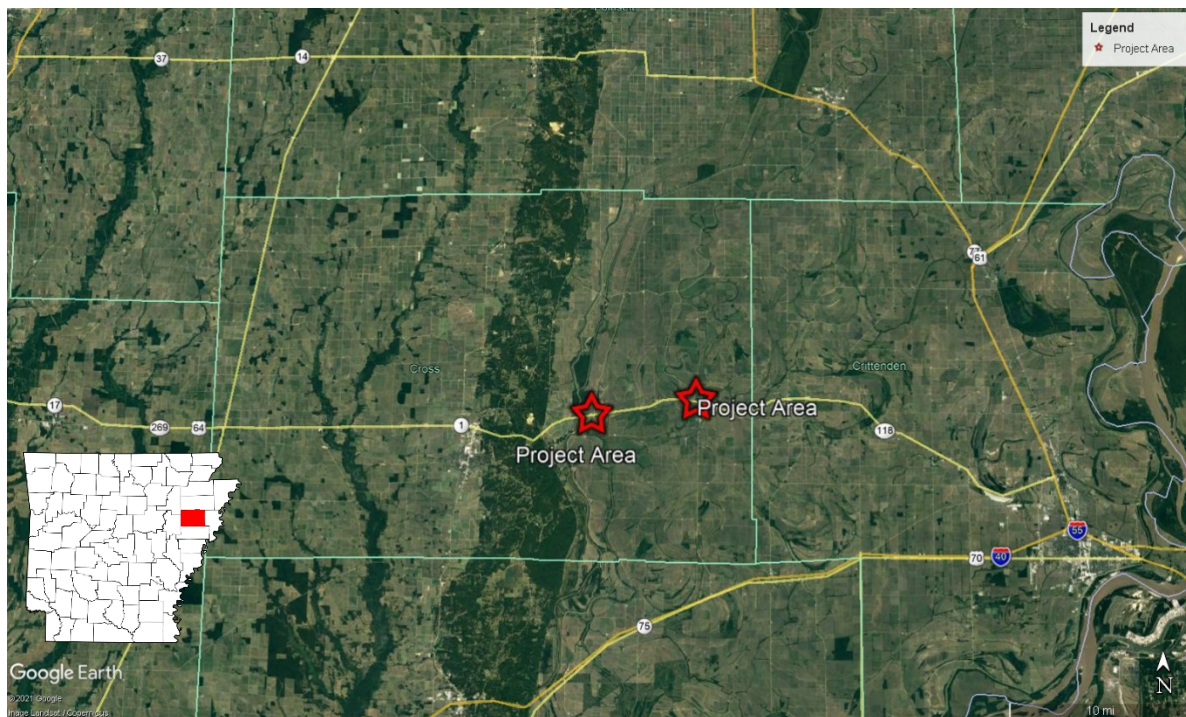

Figure 1. Locations of proposed AECC utility bores, Cross County, Arkansas.

PROJECT DESCRIPTION: Section 408 authorizes USACE to grant permission for the alteration or occupation or use of the project if USACE determines that the activity will not be injurious to the public interest and will not impair the usefulness of the project. The St. Francis Basin project, the federally authorized civil works project proposed for alteration, provides for managing flood risks to the alluvial valley in southeast Missouri and northeastern Arkansas. Federal responsibility extends 15 feet from the landside berm and 40 feet from the riverside toe of the levee. The proposed conduit routes follow the path of Highway 64. Each utility site will include two, 1.25-inch conduits that will be bored at a minimum 25-foot distance under the riverbed or levee. The four sites include the St. Francis Bayou, Highway 64 at County Rd. 401, Maggot Slough, and St. Francis River (Figure 2). The fiber optic line will be installed and maintained at no cost to the U.S. Government.

Figure 2. Locations of the 4 proposed bores sites for fiber optic cable installation.

ENVIRONMENTAL COMPLIANCE: A decision on a Section 408 request is a federal action, and therefore subject to the National Environmental Policy Act (NEPA) and other environmental compliance requirements. The scope of analysis for the NEPA and environmental compliance evaluations for the Section 408 review should be limited to the area of alteration and those adjacent areas that are directly or indirectly affected by the alteration. As the proposed project would not result in fill material being placed into any wetlands or waters of the U.S., a Section 404(b)(1) permit is not required from USACE Regulatory Branch. Similarly, a Water Quality Certification would not be required from the States of Arkansas. Additionally, as the proposed Section 408 alteration is within the USACE project footprint, no known historic properties would be affected. Furthermore, the proposed Section 408 alteration was determined to have no effect on threatened or endangered species or their critical habitat pursuant to the

Endangered Species Act. The decision on this Section 408 request is being analyzed in accordance with NEPA and is limited to the Section 408 boundaries described herein.

PUBLIC INTEREST REVIEW: The purpose of this notice is to solicit comments from the public; federal, state, and local agencies and officials; Native American tribes; and other interested parties. Comments received within 15 days of this publication will be used in the evaluation of potential impacts of the proposed action on important resources. All comments will be considered in preparing environmental documentation pursuant to NEPA. USACE has jurisdiction under 33 USC 408, only over the specific activities that have the potential to alter existing USACE projects. Please limit comments to the area of the alteration and those adjacent areas that are directly or indirectly affected by the alteration to the federally authorized civil works project described herein. **Comments may be submitted to jennifer.hiltonsmith@usace.army.mil and should be received by August 25, 2021.**

Sincerely,

Edward P. Lambert
Chief, Environmental Compliance Branch,
Regional Planning and Environmental Division South
