**EXPIRATION DATE: August 2, 2020**

**PUBLIC NOTICE**

**U.S. Army Corps of Engineers  
Memphis District**

**U.S.C. Chapter 33, Section 408 Permission Evaluation**

**TITLE:** Section 408 Permission Evaluation for the City of Memphis Gayoso Force Main Pipe, Wolf River Harbor, Shelby County, Tennessee.

**INTRODUCTION:** The authority to grant permission for temporary or permanent alterations of any U.S. Army Corps of Engineers (USACE) federally authorized civil works project is contained in Section 14 of the Rivers and Harbors Act of 1899 and codified in 33 USC 408. The City of Memphis has requested a Section 408 Permission Evaluation to complete the replacement of the Gayoso Force Main Pipe in Shelby County, Tennessee (Figure 1).

Figure 1. Proposed Section 408 project location for Gayoso Main Pipe Replacement, Shelby County, Tennessee.

**PROJECT DESCRIPTION:** Section 408 authorizes USACE to grant permission for the alteration or occupation or use of the project if USACE determines that the activity will not be injurious to the public interest and will not impair the usefulness of the project. The Mississippi River and Tributaries system, the federally authorized civil works project proposed for alteration, provides for managing flood risks to lands outside of the levees from floodwaters of the Mississippi River. The proposed request involves replacing an existing sewer pipe within the Wolf River Harbor as part of its Sewer Assessment and Rehabilitation Program. The existing 40-inch force main pipe that crosses under the Wolf River Harbor will be replaced with a 42-inch HDPE force main pipe. The new pipe line will be installed using open cut technology and placed adjacent to the existing line, which will be left in place. The installation will require trenching of approximately 732 feet across the width of the channel.

**ENVIRONMENTAL COMPLIANCE:** A decision on a Section 408 request is a federal action, and therefore subject to the National Environmental Policy Act (NEPA) and other environmental compliance requirements. The scope of analysis for the NEPA and environmental compliance evaluations for the Section 408 review should be limited to the area of alteration and those adjacent areas that are directly or indirectly affected by the alteration. The proposed project meets criteria set forth in Nationwide Permit 3, Maintenance. Additionally, as the proposed Section 408 alteration is within the USACE project footprint, no known historic properties would be effected. Furthermore, the proposed Section 408 alteration was determined to have no effect on threatened or endangered species or their critical habitat pursuant to the Endangered Species Act. The decision on this Section 408 request is being analyzed in accordance with NEPA and is limited to the Section 408 boundaries described herein.

**PUBLIC INTEREST REVIEW:** The purpose of this notice is to solicit comments from the public; federal, state, and local agencies and officials; Native American Tribes; and other interested parties. Comments received within 15 days of this publication will be used in the evaluation of potential impacts of the proposed action on important resources. All comments will be considered in preparing environmental documentation pursuant to NEPA. USACE has jurisdiction under 33 USC 408, only over the specific activities that have the potential to alter existing USACE projects.

Please limit comments to the area of the alteration and those adjacent areas that are directly or indirectly affected by the alteration to the federally authorized civil works project described herein. **Comments may be submitted to [jennifer.hiltonsmith@usace.army.mil](mailto:jennifer.hiltonsmith@usace.army.mil) and should be received by August 2, 2020.**

Sincerely,

A handwritten signature in blue ink that reads "Edward P. Lambert". The signature is written in a cursive style with a long horizontal stroke at the end.
