AUTHORITY: Pursuant to 33 CFR 325, as published in the Federal Register dated November 13, 1986, this notice announces an application submitted for a Department of the Army permit under Section 10 of the Rivers & Harbors Act.

APPLICANT:

Mr. Patrick D. Peay
Mississippi Limestone Corporation
1500 Port Road
Friars Point, Mississippi 38631

PURPOSE: The purpose of the project is to dredge fine aggregate (sand) that meets the U.S. Army Corps of Engineers specifications to be used in the manufacturing of articulated concrete mattress. These articulated concrete mattresses are used in connection to the Mississippi River Corps of Engineers Channel Improvement program (see attached map).

LOCATION: The project area will be located in the Mississippi River in Mississippi County, Arkansas, across from the Corps of Engineers office site at Richardson Landing in Drummonds, Tipton County, Tennessee, near River Mile 769.0, at Latitude 35.5213° and Longitude -89.8927°, as shown on the Nodena, ARK-TENN, 7.5-minute quadrangle map.

DESCRIPTION OF WORK: The applicant proposes to dredge approximately 65,000 tons of sand from the Mississippi River and stockpile the material at the Corps of Engineers casting field until utilized in manufacturing the articulated concrete mattress. Sand will be unloaded at Richardson Landing from a flat deck barge. Sand will then be unloaded onto trucks utilizing a machine barge that contains an excavator, and a small hopper with a 36-inch belt to a larger hopper which will enable trucks to drive under and be loaded. Trucks will then dump sand in supply piles in upland areas where it will be pushed by dozers and loaders.

AVOIDANCE/MINIMIZATION: The applicant will only dredge the minimum amount required to meet the project purpose.

MITIGATION: The applicant did not propose compensatory mitigation.

ENDANGERED SPECIES: This notice is being coordinated with the U.S. Fish and Wildlife Service (USFWS). The proposed activities are part of the Memphis District’s Channel Improvement Program of the Mississippi River and Tributaries Project. The associated effects of the channel improvement
program on the endangered pallid sturgeon, interior least tern, and fat pocketbook mussel are included in the USFWS Biological Opinion, dated 12 December 2013. A review of the USFWS, ECOS species by county report indicates that two endangered species may occur in the project area. These include the Least tern (*Sternula antillarum*) and Pallid sturgeon (*Scaphirhynchus albus*). Any comments USFWS, or other interested parties, may have regarding these or other endangered or threatened species or their critical habitat, will be considered in our evaluation of the described work.

**CULTURAL RESOURCES:** A review of the National Register of Historic Places indicated no known resources within the project area. However, the Memphis District will evaluate information provided by the State Historic Preservation Officer, federally recognized Tribes, and the public in response to this public notice and we may require a survey of the project area.

**FLOODPLAIN:** In accordance with 44 CFR Pat 60 (Floodplain Management and Use), Participating communities are required to review all proposed development to determine if a floodplain development permit is required. Floodplain administrators should review the proposed public notice and notify this office of any floodplain development permit requirements.

**PUBLIC INTEREST REVIEW:** The purpose of this public notice is to advise all interested parties of the activities for which a permit is sought, and to solicit comments and information necessary to evaluate the probable impact on the public.

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the project must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the project will be considered, including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; federal, state, and local agencies and officials; federally recognized tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

**PUBLIC HEARING:** Any person may request, in writing, within the comment period specified in this notice that a public hearing be held to consider this application. Requests for a public hearing shall state, with particularity, the reason for holding a public hearing. The District Engineer will determine if the issues raised are substantial and whether a hearing is needed for making a decision. If a public hearing is held, it will be for the purpose of obtaining additional information that we could not otherwise
obtain through a public notice process; not to inform the public about the specific details of the project in greater detail than what is found in this notice.

**COMMENTS OR REQUEST FOR ADDITIONAL INFORMATION:** Send comments to the Corps of Engineers, Memphis District. Comments must be received by the expiration date listed on page one of this notice and may be sent via mail or email to the following:

U. S. Army Corps of Engineers – Memphis District  
ATTN: Randy Clark  
167 N. Main Street, Room B-202  
Memphis, Tennessee 38103-1894  
E-mail: james.r.clark@usace.army.mil  
Phone: (901) 544-0735  
Fax: (901) 544-0211

The Corps of Engineers may provide copies of all comments, (including name & address of those providing comments) to the applicant for consideration and response prior to a decision. Comments must be received by the expiration date listed on page one of this notice.

For Final Individual Permits actions in the Memphis District, go to the following link: [http://geo.usace.army.mil/egis/?p=340:2:0::NO:RP](http://geo.usace.army.mil/egis/?p=340:2:0::NO:RP). Using the Filter by District drop down box, select MVM-Memphis District, then select the year and month (information will populate in the table below). All pending individual permits can be located by selecting the "Pending IP" tab above. All of the environmental documents and statements of findings supporting issuance or denial of the permit decisions are available upon written request and where applicable, upon the payment of administrative fees. They are also available at the Memphis District, Regulatory Branch office for examination.
