Tanya -

Thanks so much. I'll let the team know and send out a calendar invite shortly.

Thanks,

Tanya -

It looks like May 6th is the date that works for our team. Does late morning or early afternoon work?

Thanks!

Tanya -

I'll follow up with our team on the dates and will get back with you.

Yes, we understand and have relayed the information that we must have USACE approved permits to begin construction. As the media has communicated, there are mediations taking place regarding the project and our design team has temporarily been put on hold as they come to an agreement. I do not know specifics regarding construction timing, however, we are continuing to communicate the permitting requirements.

Thanks!

Subject: FW: Follow Up on Tom Lee Park

Lindsey,

It has been brought to my attention that the local news is reporting that construction of this project may start in June. Please remember from the last meeting we had, it was discussed that any fill placed on the park will require an in depth slope stability design which we believe will be challenging. Please let all involved know the timeline and construction for this proposed work is dependent on getting the proper permits. Tom Lee Park is owned by the City of Memphis and they are step 1 in the approval process but it is also a federal project and requires Section 408 permissions/ Regulatory permits from USACE prior to any work being started. As discussed in our previous meeting, it must be proven that there will be no adverse effect to the stabilization project in order to grant 408 permission. Should this stabilization project fail, navigation will be seriously impeded.

Please let me know which of the dates below works for your team. We look forward to discussing what you are proposing for this project.

Tanya -

We wanted to reach out and see what your team's availability is to schedule another meeting regarding Tom Lee park. We're out about a month out refining concepts and grading numbers, etc. but wanted to see if we could get a few dates that would work in May.

Thanks!
