Published every
Tuesday and Friday

Mississippi River

Low Water Update

Our Mission

The Memphis District, U.S. Army Corps of Engineers, will continuously and proactively plan for and execute actions in order to ensure authorized navigation channels and harbors are sustained. We will collaborate with all relevant Corps elements, navigation and port partners, and other stakeholders as part of a unified region, and leverage all available resources and capabilities.

Purpose of this newsletter

To inform the public and our partners on the status of harbors, the navigation channel, and current and future operations.

Additional information

General conditions: The Mississippi River continues to fluctuate due to rainfall amounts and navigation/reservoir operations in the Ohio Basin. This morning, the Cairo gage was 10.7 feet and is expected to rise to near 11.8 feet on Sunday before falling back to about 10.8 feet by Wednesday. At Memphis, the gage was minus 6.3 feet and will continue to fluctuate ending near minus 6.1 feet on Wednesday. No significant rainfall is forecast across the Tennessee and Ohio Valleys through Wednesday.
