of Engineers  
Memphis District

# Public Notice

**FILE NUMBER: MVM-2019-296 (BSP)**

**NOTICE DATE:**  
**November 7, 2019**

**EXPIRATION DATE:**  
Attn: Postmaster,  
Please Post Until  **December 7, 2019**

## Joint Public Notice

### **U.S. Army Corps of Engineers and State of Arkansas**

**AUTHORITY:** Pursuant to 33 CFR 325, as published in the Federal Register dated November 13, 1986, this notice announces an application submitted for a Department of the Army permit under Section 404 of the Clean Water Act.

**APPLICANT:**

Brenda B. Catlett  
P.O. Box 201  
Burdette, Arkansas 72321  
(870) 740-9500

**PURPOSE:** According the applicant, the purpose of the proposed project is to increase farm productivity and efficiency at the project site.

**LOCATION:** The project site is located in Section 27, Township 1N, Range 1W, in Monroe County, Arkansas, at approximate Latitude 34.665454° and Longitude -91.097779° as shown on the attached map (Attachment 1).

**DESCRIPTION OF WORK:** The applicant proposes to mechanically clear and land level a forested wetland area that totals 5.3 acres. The wetland impact sites consist of a mixture of sugarberry (*Celtis laevigata*), bitternut hickory (*Carya cordiformis*), red maple (*Acer rubrum*), willow oak (*Quercus phellos*), and possumhaw (*Ilex decidua*) and are located within a larger tract that also contains upland forested areas (Attachment 2).

**AVOIDANCE/MINIMIZATION:** According to the applicant, avoiding the existing wetlands would not allow her to meet her purpose of increasing farm productivity and efficiency at the project site.

**MITIGATION:** The applicant proposes to mitigate wetland impacts at a 2:1 ratio with the restoration of 10.6 acres of bottomland hardwoods (Attachment 2). The mitigation site is located in Section 23, Township 1N, Range 1W, in Monroe County, Arkansas.

**WATER QUALITY CERTIFICATION:** By copy of this public notice, the applicant is requesting water quality certification from the Arkansas Department of Environmental Quality that the activity will comply with applicable requirements set forth in 33 U.S.C. and 1341 (a)(1) of the Clean Water Act and all state laws and regulations promulgated pursuant thereto. This certification or evidence of the water quality certification or waiver of the right to certify must be submitted prior to the issuance of a Corps of Engineers permit. The Corps of Engineers evaluation of the impact of the activity on the public interest will include application of the guidelines promulgated by the Administrator, EPA, under authority of Section 404(b) of the Clean Water Act.

**ENDANGERED SPECIES:** The Red-cockaded Woodpecker (*Picoides borealis*), and pondberry (*Lindera melissifolia*) are listed as endangered by the U.S. Fish and Wildlife Service (USFWS) and may be present at or near the project location. This notice is being coordinated with the USFWS. Any comments USFWS may have regarding endangered or threatened wildlife or plants, or their critical habitat, will be considered in our evaluation of the described work.

**CULTURAL RESOURCES:** In compliance with Section 106 of the National Historic Preservation Act of 1966 (NHPA), as amended, the Memphis District is soliciting comments from federal, state, and local agencies, federally-recognized Indian Tribes, the public, and other interested parties in order to identify and evaluate potential impacts of the proposed action on historic properties.

**FLOODPLAIN:** In accordance with 44 CFR Part 60 (Floodplain Management and Use), participating communities are required to review all proposed development to determine if a floodplain development permit is required. Floodplain administrators should review the proposed public notice and notify this office of any floodplain development permit requirements.

**PUBLIC INTEREST REVIEW:** The purpose of this public notice is to advise all interested parties of the activities for which a permit is sought and to solicit comments and information necessary to evaluate the probable impact on the public interest.

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the project, must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the project will be considered, including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; federal, state and local agencies and officials; federally recognized Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

**PUBLIC HEARING:** Any person may request, in writing, within the comment period specified in this notice that a public hearing be held to consider this application. Requests for a public hearing shall state, with particularity, the reason for holding a public hearing. The District Engineer will determine if the issues raised are substantial and whether a hearing is needed for making a decision. If a public hearing is held, it will be for the purpose of obtaining additional information that we could not otherwise obtain through a public notice process; not to inform the public about the specific details of the project in greater detail than what is found in this notice. This is not a Corps of Engineers project. We are not a proponent nor are we an opponent of the project. We are merely the permitting authority of Section 404 and Section 10 permits required by our office.

**COMMENTS OR REQUEST FOR ADDITIONAL INFORMATION:** Send comments to the Corps of Engineers, Memphis District, and the Arkansas Department of Environmental Quality. Comments may be sent via mail or email to the following:

phone: (501) 682-6263

The Corps of Engineers may provide copies of all comments, (including name & address of those providing comments) to the applicant for consideration and response prior to a decision. Comments must be received by the expiration date listed on page one of this notice.

For Final Individual Permits actions in the Memphis District, go to the following link:

[http://corpsmapu.usace.army.mil/cm\\_apex/f?p=340:1:0::NO](http://corpsmapu.usace.army.mil/cm_apex/f?p=340:1:0::NO). Using the Filter by District drop down box, select MVM-Memphis District, then select the year and month (information will populate in the table below). All pending individual permits can be located by selecting the “**Pending IP**” tab above. All of the environmental documents and statements of findings supporting issuance or denial of the permit decisions are available upon written request and where applicable, upon the payment of administrative fees. They are also available at the Memphis District, Regulatory Branch office for examination.

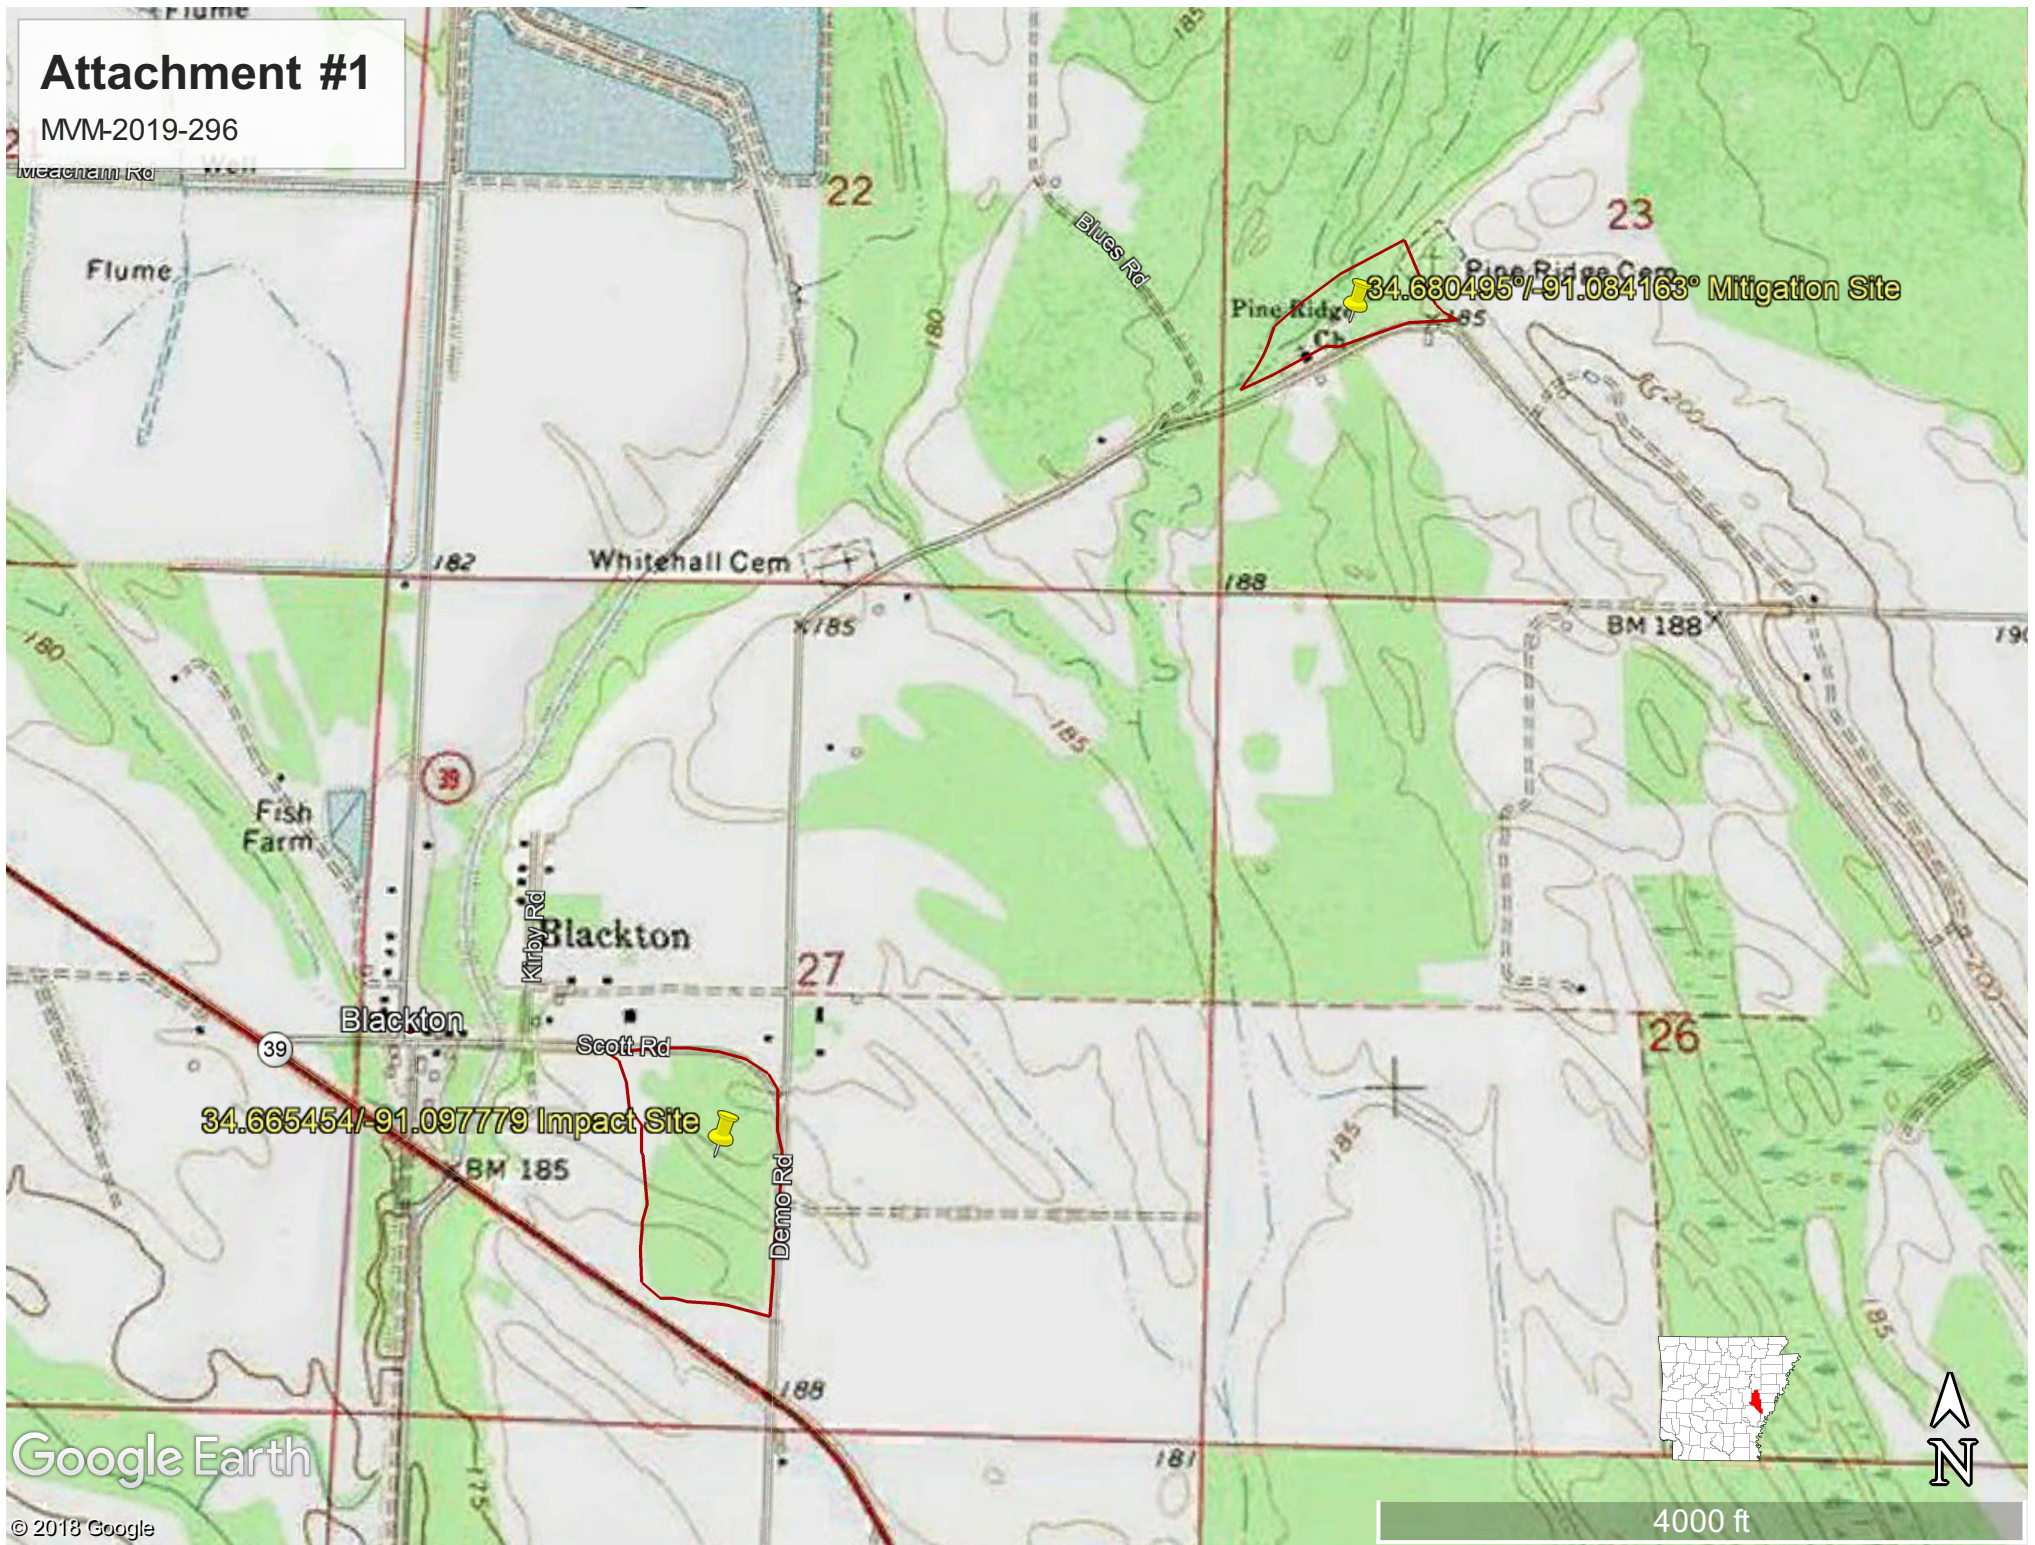

Gregg W. Williams  
Chief  
Regulatory Branch
