

US Army Corps of Engineers Memphis District

FILE NUMBER: MVM-1998-306 (RDM)

NOTICE DATE: September 12, 2014

Attn: Postmaster, Please Post Until EXPIRATION DATE: October 12, 2014

<u>Joint Public Notice</u> U.S. Army Corps of Engineers and State of Arkansas

AUTHORITY: Pursuant to 33 CFR 325, as published in the Federal Register dated November 13, 1986, this notice announces an application submitted for a Department of the Army permit under Section 404 of the Clean Water Act.

APPLICANT:

Gerry Ault 4044 McIngvale Road Hernando, Mississippi 38632

PURPOSE: The applicant is proposing to modify an existing permitted moist soil area to return approximately 5.99 acres back to the floodplain of the L'Anguille River and construct a raised access pathway to a pit blind for the purpose of waterfowl hunting.

LOCATION: The project is located in Sections 24 & 25, Township 4N, and Range 2E in St. Francis County, Arkansas, at approximate latitude 34.9356°N and longitude -90.8437°W on the Haynes, AR 7.5 minute quadrangle map (Figure 1, Attached).

DESCRIPTION OF WORK: The applicant proposes to remove approximately 1,113 linear feet of existing levee and relocate it approximately 100 yards inland. The existing levee cross section is approximately 12 feet wide at the crown and 4 feet high with 3:1 side slopes. The material removed from the existing levee would be used to construct the new levee and a raised access path to a pit blind. The new levee will be approximately 870 feet long, 12 feet wide at the crown and 4 feet high with 3:1 side slopes; approximately 0.7-acre of emergent wetland will be filled for the construction. The raised pathway will be approximately 660 feet long, 12 feet wide at the crown, 1.5 feet high, with 3:1 side slopes; approximately 0.3-acre of emergent wetland would be filled. (Figure 2, Attached)

AVOIDANCE, MINIMIZATION, & COMPENSATION: The applicant proposes to remove 0.9-acre of fill from the existing levee alignment. This would return approximately 5.99 acres back to the floodplain of the L'Anguille River, resulting in an increase of approximately 24 acre-feet of flood storage. The applicant also proposes to plant 0.5-acre of the restored old levee alignment in herbaceous wetland vegetation.

WATER QUALITY CERTIFICATION: By copy of this public notice, the applicant is requesting water quality certification from the Arkansas Department of Environmental Quality that the activity will comply with applicable requirements set forth in 33 U.S.C. and 1341 (a)(1) of the Clean Water Act and all State laws and regulations promulgated pursuant thereto. This certification or evidence of the water quality certification or waiver of the right to certify must be submitted prior to the issuance of a Corps of Engineers permit. The Corps of Engineers' evaluation of the impact of the activity on the public interest will include application of the guidelines promulgated by the Administrator, EPA, under authority of Section 404(b) of the Clean Water Act.

ENDANGERED SPECIES: Our preliminary determination is that the proposed activity will not affect Threatened, Proposed for Listing, or listed Endangered Species or their critical habitat. A copy of this notice is being furnished to the U.S. Fish and Wildlife Service and appropriate state agencies and constitutes a request to those agencies for information on whether any listed or proposed-to-be-listed endangered or threatened species may be present in the area which would be affected by the proposed activity.

CULTURAL RESOURCES: The Memphis District will evaluate information provided by the State Historic Preservation Officer, Federally-recognized Tribes and the public in response to this public notice and we may conduct or require a survey of the project area.

FLOOD PLAIN: In accordance with 44 CFR Part 60 (Flood Plain Management and Use), participating communities are required to review all proposed development to determine if a flood plain development permit is required. Flood plain administrators should review the proposed public notice and notify this office of any flood plain development permit requirements.

PUBLIC INTEREST REVIEW: The purpose of this public notice is to advise all interested parties of the activities for which a permit is sought and to solicit comments and information necessary to evaluate the probable impact on the public interest.

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the project must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the project will be considered, including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; Federal, state and local agencies and officials; Federally recognized Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

PUBLIC HEARING: Any person may request, in writing, within the comment period specified in this notice that a public hearing be held to consider this application. Requests for a public hearing shall state, with particularity, the reason for holding a public hearing. The District Engineer will determine if the issues raised are substantial and whether a hearing is needed for making a decision. If a public hearing is held, it will be for the purpose of obtaining additional information that we could not otherwise obtain through a public notice process; not to inform the public about the specific details of the project in greater detail than what is found in this notice. This is not a Corps project. We are not a proponent nor are we an opponent of the project. We are merely the permitting authority of Section 404 and Section 10 permits required by our office.

COMMENTS OR REQUEST FOR ADDITIONAL INFORMATION: Send comments to the Corps of Engineers, Memphis District and Arkansas Department of Environmental Quality. Comments may be sent via mail or E-mail to the following:

U.S. Army Engineer District-Memphis ATTN: Damon McDermott 167 North Main Street, Room B-202 Memphis, Tennessee 38103-1894 E-mail: robert.d.mcdermott@usace.army.mil phone: (901) 544-0732 fax: (901) 544-0211 Mark Hathcote State Permits Branch, Water Division Arkansas Department of Environmental Quality 5301 North Shore Drive Little Rock, Arkansas 72118-5317 E-mail: <u>hathcote@adeq.state.ar.us</u>

The Corps may provide copies of all comments, (including name & address of those providing comments) to the applicant for consideration and response prior to a decision. Comments should be received by the expiration date listed on page one of this notice.

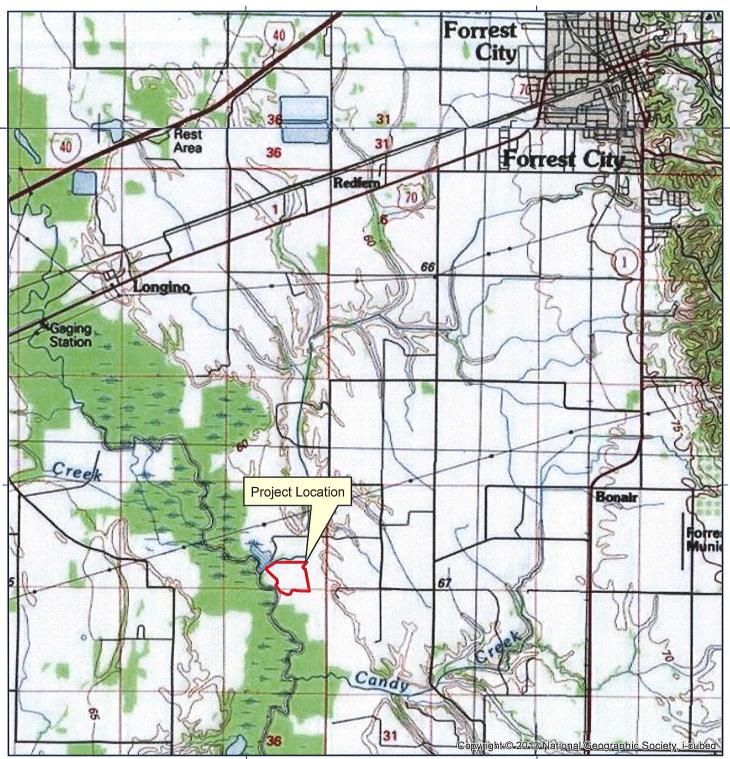

FOR FINAL INDIVIDUAL PERMIT ACTIONS IN THE MEMPHIS DISTRICT, GO TO THE

FOLLOWING LINK: <u>http://geo.usace.army.mil/egis/f?p=340:2:0::NO:RP</u>. Using the Filter by District drop down box, select MVM-Memphis District, then select the year and month (information will populate in the table below). All pending individual permits can be located by selecting the "**Pending IP**" tab above. All of the environmental documents and statements of findings supporting issuance or denial of the permit decisions are available upon written request and where applicable, upon the payment of administrative fees. They are also available at the Memphis District, Regulatory Branch office for examination.
